SCIENCE PODCAST REVIEW

STUDENT NAME:

PODCAST TITLE:

WEBSITE ADDRESS:

PRESENTERS:

SUMMARY

Briefly summarise the podcast content. Keep your summary short: use dot points, focus on the intended audience, purpose and main points. People are less likely to read a long summary. Try to limit it to a paragraph. If possible, include the presenter's credentials, this allows the reader to determine the credibility of the source.

SCIENCE COMMUNICATION

Consider the podcast
- What features of the podcast make it engaging for the audience?
- How effectively do the presenters communicate scientific ideas?

SCIENCE CREDIBILITY

Consider the quality of scientific ideas
- Are there evidence the ideas are supported by science?
- Why might you trust the presenter's credentials?

FINAL THOUGHTS

- What wonderings or unanswered questions, do you have?
- What else do you think a prospective listener should know?

SIMILAR PODCASTS YOU MIGHT LIKE

- Locate and list other podcasts on similar topics that you think listeners might enjoy.
- Suggest reasons for these choices.

RECOMMENDATION

- Would you recommend this podcast and for what audience?
- Share your final recommendation in a few sentences.
- Colour the stars to indicate your rating out of five. (5 stars = highly recommended).
